EXHIBIT #8

Sec. III para. 13

UNATTENDED OPERATION:

Applicant proposes unattended operation and certifies compliance with the following requirements:

- 1) The transmitter site can be reached promptly at all hours and in all seasons.
- 2) The transmitter will be equipped with suitable automatic circuits which will place it in a non-radiating condition in the absence of a signal on the input channel.
- 3) The transmitting apparatus will be adequately protected against tampering by unauthorized persons.
- 4) The Commission will be supplied with the name, address and telephone number of a person or persons who may be contacted to secure suspension of operation of the translator promptly should such action be deemed necessary by the Commission. Such information will be kept current by the licensee, and the Primary Station, KGTL-FM, Homer, which is rebroadcast via this translator station.

# ENGINEERING DATA

## 6. Facilities authorized in construction permit.

a. Output Channel No. 265A Frequency: 100.9 MHz	Transmitter output power 10 watts Dual Output	Proposed Principal Community or Communities to be served: City: Kenai & Soldotna State: Alaska	Primary Station: Call: KGTL-FM Channel No. 278 City: Homer State: Alaska Frequency: 103.5 MHz
b. Input Channel No. 278 Frequency: 103.5 MHz			

## 7. Transmitter location

City Soldotna	County Kenai Peninsula Borough	State Alaska
Address or other description of location Mile 3.5 Kenai Spur Road ALASCOM Radio Relay Site #17		Geographical coordinates of transmitting antenna to nearest second North Latitude 60° 31' 57" West Longitude 151° 04' 51"

8. Does the apparatus constructed, the transmitter location, or mode of operation differ from that described in the application for construction permit or in the permit issued by the Commission? ☐ Yes ☒ No
- If "Yes", describe in detail, by attaching Exhibit No. \_\_\_\_\_, the nature of changes, particularly with regard to type of transmitter, transmitting antenna, antenna orientation, transmission line, or increase in overall height above ground of either the transmitting or receiving antenna structure. Show recomputation of effective radiated power resulting from any such changes.

9. If antenna obstruction painting and lighting specifications were made a part of the construction permit, have same been installed as prescribed and in proper working order? ☒ Yes ☐ No
- If "No", explain in Exhibit No. \_\_\_\_\_, attached. ☐ Not Required

10. Give name, address, ZIP Code, and telephone number of person(s) to contact if transmitter must be turned off in event of emergency:

David F. Becker (907) 235-7551  
 P. O. Box 103  
 Homer, Alaska 99603

The APPLICANT hereby waives any claim to the use of any particular frequency or of the ether as against the regulatory power of the United States because of the previous use of the same, whether by license or otherwise, and requests an authorization in accordance with this application. (See Section 304 of the Communications Act of 1934.)

The APPLICANT represents that this application is not filed for the purpose of impeding, obstructing, or delaying determination on any other application with which it may be in conflict.

The APPLICANT acknowledges that all the statements made in this application and attached exhibits are considered material representations, and that all the exhibits are a material part hereof and are incorporated herein as if set out in full in the application

## CERTIFICATION

I certify that the statements in this application are true, complete, and correct to the best of my knowledge and belief, and are made in good faith.

WILLFUL FALSE STATEMENTS MADE ON THIS FORM ARE PUNISHABLE BY FINE AND IMPRISONMENT. U.S. CODE, TITLE 18, SECTION 1001.

### FCC NOTICE TO INDIVIDUALS REQUIRED BY THE PRIVACY ACT

The solicitation of personal information requested in this application is authorized by the Communications Act of 1934, as amended.

The principal purpose(s) for which the information will be used is to determine if the benefit requested is consistent with the public interest.

The staff, consisting variously of attorneys, accountants, engineers, and application examiners, will use the information to determine whether the application should be granted, denied, dismissed, or designated for hearing. If all the information requested is not provided, the application may be returned without action having been taken upon it or its processing may be delayed while a request is made to provide the missing information. Accordingly, every effort should be made to provide all necessary information.

THE FOREGOING NOTICE IS REQUIRED BY THE PRIVACY ACT OF 1974, P.L. 93-579, DECEMBER 31, 1974, 5 U. S. C. 552a(e) (3).

| (a) an application which has been dismissed with prejudice by the Commission?                                   | <u>      </u> | <u>XXX</u>    |
| (b) an application which has been denied by the Commission?                                                     | <u>      </u> | <u>XXX</u>    |
| (c) a broadcast station, the license which has been revoked?                                                    | <u>      </u> | <u>XXX</u>    |
| (d) an application in any Commission proceeding which left unresolved character issues against the applicant?   | <u>      </u> | <u>XXX</u>    |

If the answer to any of the questions in 5 is yes, state in Exhibit No. \_\_\_\_\_ the following information:

- (i) Name of party having such interest;
- (ii) Nature of interest or connection, giving dates;
- (iii) Call letters of stations or file number of application, or docket number;
- (iv) Location

MINORITY OWNERSHIP

7. Is the applicant over 50 percent minority owned?        Yes XX No

If the answer is yes, state in Exhibit No. \_\_\_\_\_ for each minority owner:

- (i) Name, address and percentage of ownership;
- (ii) Minority group (e.g., Black not of Hispanic origin, Asian or Pacific Islander, American Indian or Alaskan native, and Hispanic).

### SECTION III

#### FINANCIAL QUALIFICATIONS

NOTE: If this application is for a change in an operating facility,  
do not fill out this section.

NOT APPLICABLE

YES NO

1. The applicant certifies that sufficient net liquid assets are on hand or are available from committed sources to construct and operate the requested facilities for three months without revenue. ☐ ☐
  
2. The applicant certifies that: (a) it has a reasonable assurance of a present firm intention for each agreement to furnish capital or purchase capital stock by parties to the application, each loan by banks, financial institutions or others and each purchase of equipment on credit; (b) it can and will meet all contractual requirements as to collateral, guarantees, and capital investment; (c) it has determined that a reasonable assurance exists that all such sources (excluding banks, financial institutions and equipment manufacturers) have sufficient net liquid assets to meet these commitments. ☐ ☐

## ENGINEERING DATA

## 1. Facilities requested:

a. Output Channel No. 265A (100.9Mhz)	Transmitter Output Power 100 (watts) per community	Proposed Principal Community or Communities to be served: City: (1)Kenai (2)Soldotna State: Alaska	Primary Station (station to be rebroadcast) (Translator only) see Call: KGTL Channel No. Exhibit #1 City: Homer State: Alaska Frequency: .620 MHz
b. Offset (Low Power TV and TV Translator Stations only) <input type="checkbox"/> No offset <input type="checkbox"/> Plus offset <input type="checkbox"/> Zero offset <input type="checkbox"/> Minus offset			
c. Input Channel No. Via FM SCA See Exhibit #2	If station is to operate via another translator station, indicate call sign and location of final intermediate translator.		

## 2. Proposed transmitter location: (NO CHANGE IN EXISTING FM TRANSLATOR LOCATION)

City	County	State
Address or other description of location Existing station - K265BJ		Geographical coordinates of transmitting antenna to nearest second North Latitude    "    West Longitude    " 0    "    0    "

Attach as Exhibit No. N/A a map or maps (preferably topographic, if obtainable, such as U. S. Geological Survey quadrangles) for the area of the proposed transmitter location and show drawn thereon the following data:

- Scale of miles.
- Proposed transmitter location accurately plotted.
- Principal community to be served by the proposed TV or FM translator station, clearly identified and labeled.
- Locations of all known radio stations (except amateur), such as AM, FM, TV, Translator, Police, Fire, Aeronautical, Public Utility, etc., and known commercial or government receiving sites, within the immediate vicinity of the proposed transmitter location.

## 3. Transmitter:

Make TEPCO CORP. " " QEI CORP.	Type No. ROBERT A. JONES J-316 ROBERT A. JONES J-319 675T150 Amplifier	Rated output power (watts) P 1 watt 10 watts @ two outputs 100 watts @ two outputs
-----------------------------------------	---------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------

## 4. Transmission line:

Make Cablewave	Type No. FLC12-50J	Length 350 ft	Rated efficiency E for length given (decimal fraction) .60
-------------------	-----------------------	------------------	---------------------------------------------------------------

## 5. Transmitting antenna

Manufacturer SCALA ELECTRONIC CORP.	Model No. 1/ HDCA - 10	Description 1/ 2 sets- 10 element Yagi (stacked two vertically)	Power gain G (multiplier) in lobe of maximum radiation relative to a half-wave dipole 4.3	Height of radiation center above mean sea level 472 (ft)
Orientation 2/ (1) 235° & 300° (2) 90° & 170°	Height above ground 3/ 315 ft.	Elevation of Site 4/ 162 ft.	Elevation of Community 5/ (1) 85 ft (2) 105 ft	
Effective radiated power R (R = P × E × G) (kW)			258 watts	

- Give basic type using general descriptive terms such as half-wave dipole, "bow-tie" with screen, corner reflector, 10 element Yagi, 4 element in-phase array, two stacked 5 element Yagis, etc.
- Show the direction of the main radiation lobe in degrees with respect to true north in a 360 degree horizontal azimuth, numbered clockwise, with true north as zero azimuth.
- Show height to topmost portion of structure, including highest top mounted antenna and beacon if any.
- Show the ground elevation above mean sea level at the base of the transmitting antenna supporting structure.
- Show the average elevation of the community above mean sea level, or in lieu thereof, the commonly used elevation figure for the community to be served.

Section V, Page 2

6. Attach as Exhibit No. #3 a vertical plan sketch for the proposed total structure(s) including supporting structure(s), giving height of center of radiation above ground, overall height of structure above ground, including lighting beacon (if any) and height above mean sea level in feet for all significant features for BOTH RECEIVING AND TRANSMITTING ANTENNAS. Also indicate any horizontal separation between receiving transmitting antennas.

7. Will the proposed antenna supporting structure be shared with another station or stations of any class? ☒ YES ☐ NO  
If the answer is "Yes", list the call signs and class of such stations.

See Exhibit #9 (ammended)

8. Attach as Exhibit No. 4 & 5 a polar diagram of the radiation pattern (relative field) of the transmitting antenna, showing clearly the correct relationship between the major lobe or lobes and the minor lobes of radiation. If a non-directive transmitting antenna will be employed, i.e., an antenna with an approximately circular radiation pattern, check this ☐ and omit the polar diagram.

9. Has FAA been notified of proposed construction? ☐ YES ☒ NO  
If yes, give date and office where notice was filed. NOT REQUIRED  
(Not necessary to file FCC Form 714, See Part 17 of the rules.)

Antennas are mounted on existing tower, painted and lighted per FAA specs.

10. Unattended operation:

a. Is unattended operation proposed? (no change in existing station) ☒ YES ☐ NO  
If the answer is "Yes", and this application is for authority to construct a new station or to make changes in the facilities of an authorized station which proposes unattended operation for the first time, attach Exhibit No. , containing a full description of the means of compliance with the several requirements of Section 74.734 (TV Translators) or Section 74.1234 (FM Translators) of the Rules concerning unattended operation.

b. In space below state name, address and telephone number of a person or persons who may be contacted in an emergency to suspend operation of the translator should such action be deemed necessary by the Commission:

Name(s) Dsvid F. Becker B.S.E.E. & M.S.E.E., Gen. Radiotelephone PG-23-135

Address (street or other description)

P. O. Box 103 Mile 1.8 Diamond Ridge Road

City & State

Homer

Alaska

ZIP Code

99603

Telephone number(s) (include area code)

(907) 235-7551 or 235-7651

I certify that I represent the applicant in the capacity indicated below and that I have examined the foregoing statement of technical information and that it is true to the best of my knowledge and belief.

**License For a  
Broadcast Translator Station**

Call Sign: K265BJ

Subject to the provisions of the Communications Act of 1934, subsequent acts, and treaties, and all regulations heretofore or hereafter made by this Commission, and further subject to conditions set forth in this license, the licensee is hereby authorized to use and operate the radio transmitting apparatus hereinafter described.

1. Name of Licensee.....: Penninsula Communications, Inc.
2. License term ending 3 a.m. Local Time.....: April 1, 1989
3. Principal community to be served.....: Kenai & Soldotna, AK
4. Primary station.....: KGTL-FM, CH-278, Homer, AK
5. Via.....: Direct
6. Operating assignment.....: Channel 265A, 100.9 Mhz.
7. Hours of operation.....: Unlimited.
8. Transmitter.....: Tepco J-316 + J-319 amplifier
9. Transmitter power output.....: 10 watts dual output
10. Transmitting antenna location.....: Mile 3.5 Kenai Spur Road, Alascom Radio Relay Site, Soldotna, AK
11. North Latitude.....: 60 31 57  
West Longitude.....: 151 04 51
12. Transmitting Antenna.....: Scala, HDCA-10 Stacked 10 element yagis
13. Antenna supporting structure.....: mast-mounted at the top of a self-supporting steel tower
14. Overall height above ground.....: 315 Ft.
15. Main radiation lobe oriented.....: 170 & 300 degrees True
16. Obstruction marking specifications.....: In accordance with the following paragraphs of FCC Form 715 (attached): 1, 3, 12, 21
17. Conditions.....:

The Commission reserves the right during said license period of terminating this license or making effective any changes or modification of this license which may be necessary to comply with any decision of the Commission rendered as a result of any hearing held under the rules of the Commission prior to the commencement of this license period or any decision rendered as a result of any such hearing which has been designated but not held, prior to the commencement of this license period.

This license is issued on the licensee's representation that the statements contained in licensee's application are true and that the undertakings therein contained, so far as they are consistent herewith, will be carried out in good faith. The licensee shall, during the terms of this license, render such service as will serve public interest, convenience, or necessity to the full extent of the privileges herein conferred.

This license shall not vest in the licensee any right to operate the station nor any right in the use of the frequencies designated in the license beyond the term hereof, nor in any other manner than authorized herein. Neither the license nor the rights herein granted shall be transferred, assigned, or in any manner either voluntarily or involuntarily disposed of, or indirectly by transfer of control of the licensee, if a corporation, to any person without the written consent of the Commission. This license is subject to the right of use or control by the Government of the United States conferred by Section 806 of the Communications Act of 1934.

Dated: September 7, 1983

Federal  
Communications  
Commission

Request For Waiver  
of Section 74.1231 of  
the Commission's Rules

Peninsula Communications, Inc. licensee of FM translator K265BJ, Kenai-Soldotna, Alaska, hereby respectfully requests a waiver of Section 74.1231 of the Commission's Rules and such other rules as may be necessary to allow for the proposed change in input source to the S.C.A. programming of KGTL-FM, Homer, Alaska. The translator presently rebroadcasts the KGTL-FM signal.

Section 74.1231 specifies that FM translators shall rebroadcast the signal of an "FM station". Peninsula requests authority to rebroadcast the programming carried on the subsidiary communications spectrum of its present input FM station KGTL-FM, Homer, Alaska. This programming constitutes the beautiful music format of AM station KGTL, Homer, Alaska.

Applicant believes that the public interest supports a waiver of Section 74.1231. As an initial matter, applicant notes that neither Kenai nor Soldotna are presently served by a local, beautiful music station. The programming proposed to be carried on the translator will serve the public interest by providing programming not otherwise available over-the-air.

Moreover, the Commission has long recognized the lack of suitable

broadcast services available in the State of Alaska. The Commission has established a well-known policy of allowing for extraordinary uses of broadcast spectrum under an "Alaska exception" to its rules. In this regard, the Mass Media Bureau has granted waivers to allow FM translators in Alaska to rebroadcast S.C.A. signals as well as AM broadcast signals. Accordingly, the subject waiver request is consistent with past waivers granted to FM translators in Alaska.

The applicant is aware of the Commission's 1981 decision to reject a rulemaking proposal that sought to allow FM translators to rebroadcast AM signals. See, FM Translators, \_\_ FCC 2d \_\_, 49 RR 2d 1499 (1981). However, in that Order the Commission expressly noted that it would entertain requests for waiver of the AM rebroadcast prohibition in appropriate circumstances. See, 49 RR 2d at 1500, footnote 1. The applicant submits that the requested waiver under the "Alaska exception" is an appropriate circumstance to justify the requested carriage of KGTL(AM) via the KGTL-FM S.C.A. In fact, the Bureau has authorized FM translators K285AL and K296BG, Fort Yukon, Alaska, to rebroadcast an S.C.A. feed of KJNP(AM), North Pole, Alaska.

WHEREFORE, the applicant requests that rule waivers be granted to allow the rebroadcast of the KGTL-FM S.C.A. feed on translator K265BJ.

EXHIBIT #2

Peninsula Communications, Inc. (PCI) proposes to change the programming source to FM Translator Station, K265BJ, from KGTL-FM to KGTL(AM) as explained in Exhibit #1. PCI proposes to transmit the programming of KGTL (AM) in stereo on two sub-carriers on the signal of KGTL-FM. The demodulated SCA signal will offer both left and right channels of KGTL (AM) with a bandwidth of approximately 8 Khz. The left and right channels will then modulate a Wegener FM Modulator and Stereo Generator, Model #1691, which is currently used in applications where an FM translator station is directly fed via a satellite programming source, such as the Moody Broadcasting Network.

A block diagram of the equipment setup is shown in Figure 1. As shown, the Wegener FM modulator and SCA receiver will substitute for the direct signal of KGTL-FM. The existing station is indicated in the diagram. The existing station utilizes a Robert A Jones Multiple Output amplifier at 10 watts for each community, both Kenai and Soldotna. This amplifier is mounted on top of the tower platform at 300 feet above ground. Therefore, in order to service and adjust the amplifier it is necessary to climb the tower. This problem can be eliminated by mounting the amplifier on the ground, at the expense of line loss from about 320 feet of additional transmission line. Therefore, in order to compensate for the line loss and plus the fact that the area is somewhat rough and hilly, the additional power is needed. Accordingly, a waiver of the 10 watt power limitation found in Section 74.1235 of the Commission's rules is respectfully

EXHIBIT #2 (cont.)

requested. There is another FM translator station, K249BP, licensed to Alaska Village Missions, Inc. operating at this same site at 100 watts.(BMPFT-831006QM). A waiver of Section 74.1235 was granted by the Commission for this station, and likewise, a similar grant of waiver is requested by Peninsula Communications, Inc. for FM translator station, K265BJ.

As shown in Figure 2 of this exhibit, there are two populated areas ...."Nikiska" which is approximately 17 miles to the north of the transmitter site and "Sterling" approximately 12 to 15 miles east of the site. The path to Sterling is very hilly and rough terrain, while the path to Nikishka is somewhat smoother although greater in distance. Presently, both of these communities receive very little or no service. The increase in power to 100 watts to both areas would substantially improve the signal to where reception would be feasible with an outside FM yagi antenna.

As the Commission stated in Maximum Allowable Power of FM Translators, \_\_\_ FCC 2d \_\_\_, 44 RR 2d 934 (1978), requests for higher power operation by FM translator applicants will be considered on an individual, waiver basis. In general, such waiver requests should be supported by the documentation on the need for the higher power requested. It is the applicants belief that there is sufficient justification for granting the waiver request based on both the precedent of granting 100 watts to Alaska Village Missions, Inc. and the factor of both terrain roughness and distances involved. Also, the lack of diversity of programming would be improved by the additional service

EXHIBIT #2 (cont.)

this FM translator station will provide.

In addition, PCI submits that the Commission has on a number of occasions recognized the unique nature of the communications industry in Alaska and the distinct lack of adequate communications services in the state. For example, in Wrangell Radio Group, 75 FCC 2d 404, 46 RR 2d 1329 (1979), the Commission granted applications proposing satellite-fed TV translators in seven Alaskan communities. The Commission based its decision on the need for additional over-the-air broadcast signals to serve small, isolated communities in the state. As the commission noted:

The State of Alaska contains numerous small, isolated, and remote villages. Many of these remote native villages are more than 500 miles apart. As a result, television broadcast signals are not readily available off-the-air in most Alaskan communities. Additionally, the tremendous cost and impracticality (in some cases impossibility) of utilizing microwave to link these communities to broadcast signal sources leaves many communities without off-the-air broadcast programming as we know it in the lower 48 states.

PCI believes that for these same reasons, the use of an SCA - feed and 100 watts power per community by its FM translator K265BJ, should be granted in order to provide a diversity of programming sources and improved signal to the communities of Kenai and Soldotna, as well as the outlying communities of Nikishka and Sterling, Alaska.
